

GLASS WALLS

SINGLE GLAZING

The single glazing line up consists of many profiles which make the final product.

Acting as a key design element in any space, glazed walls are sure to provide privacy while allowing uninterrupted lines of sight and flow of light.

Colour options from our standard five finishes, or Limitless with any RAL number.

Regardless of the application, many of our profiles will cross integrate. This results in a greater number of options and configurations to specify, making things easy.
