

PC350
WE CREATE INSPIRED WORKSPACES

DOOR SOLUTIONS

PC350 Doors work in perfect harmony with our solid and glass wall panels. Choose any or all of our three options – Sliding, Swing and Pivot Doors to support your sustainable solutions.

SLIDING DOORS

Sliding Doors can maximize your footprint while providing elegance and functionality. PC350 sliding doors are offered in both inline and traditional barn. A top-fastened track provides clear, unobstructed lines, and acoustic barriers to help control noise, while traditional barn sliding doors integrate with a variety of surfaces and offer flexibility in areas with limited walk-through areas.

BENEFITS

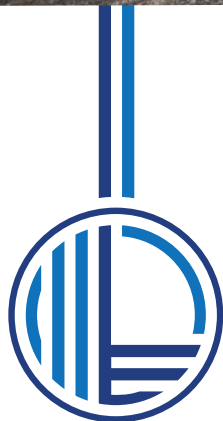

- Inline mounts firmly to the ceiling so additional bracing is not required
- Locking options are available on the door directly into the adjoining jamb, as well as a variety of compatible door pulls
- Soft open and close technology ensures the door stays in the open or closed position, extending the lifecycle of the door and hardware
- Choose from solid core wood doors (with optional glass cut-out) and framed aluminum

ADDED FEATURES

- Aluminum Doors are available with both 2" (51mm) and 3 1/2" (89 mm) stiles and are easily customizable
- Glazing compatibilities include 1/4" (6mm), 3/8" (10mm) and 1/2" (12mm)
- Glazing types include clear tempered, laminated, low iron, acid etch and LCD privacy glass
- There is no floor track which provides a clean, elevated aesthetic
- Designed for full accessibility

SWING DOORS

Swing Doors are a reliable choice that stand the test of time for both durability and functionality, incorporating butt hinges to match your interior wall finish. Specify automatic door drops or sweeps to aluminum doors to create a strong seal with high acoustical values for better STC ratings.

BENEFITS

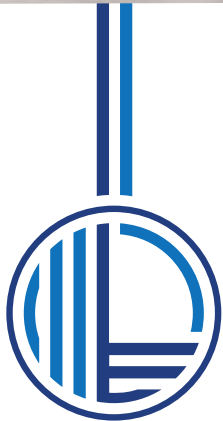

- Choose from a wide variety of compatible hardware options and designs to simplify the specification process
- Wood Swing Door options and finishes are available on their own or with added glass cut outs
- Aluminum Doors are available in 2" (51mm) and 5" (127mm) profiles and are fully customizable
- Auto drop seals and sweeps are available for both aluminum and wood Swing Doors

ADDED FEATURES

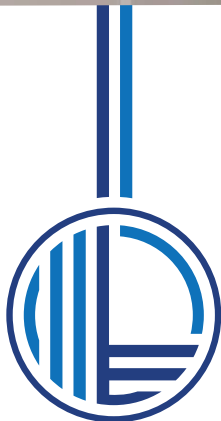

- Butt hinges and door pull finishes can be matched to interior wall, creating a great balance between strength and style
- Glazing compatibilities include 1/4" (6mm), 3/8" (10mm) and 1/2" (12mm)
- Glazing types include clear tempered, laminated, low iron, acid etch and LCD privacy glass
- Standard lever or ladder pulls available for locking and non-locking requirements

PIVOT DOORS

Grounded in the foundations of modern architecture, a Pivot Door accentuates clean lines and elegant motion. Pivot Doors need less clearance space and offer a unique aesthetic to elevate any room.

BENEFITS

- Free Swing and Self-Closing options available
- Hardware options include patch fittings, hold open option available, handles (lever and ladder pulls), door closers (incorporated into patch fittings), locks
- PC350 Pivot frameless glass swing doors integrate into a straight or curved configurations
- Available in 90-degree swing with rested stop/or 180-degree swing with door pull

ADDED FEATURES

- Glazing compatibilities include 3/8" (10mm) and 1/2" (12mm)
- Glazing types include clear tempered, low iron and acid etch
- Door pulls and patch fittings can be finished to match the colour of the wall
- Pivot hardware is floor-mounted and does not require embedding into the floor slab
