

Slide into Style

WHERE ELEGANCE MEETS
INNOVATION

Designed For Visionaries. Built For Performance.

Introducing PC350 Sliding Door Solutions, a new standard in workspace design. Engineered as architectural elements of transformation, these doors merge sleek aesthetics with future-focused innovation.

Our stylish sliding doors offer more than access points, they are performance, which is driven and tailored for today's architects, designers and project leaders. Thoughtfully crafted to support fluid transitions, visual openness, and acoustic control, this solution redefines how space works for you.

Designed to Flow

FUNCTIONAL PERFORMANCE
MEETS ARCHITECTURAL INTENT

Our Sliding Door Solutions seamlessly blend with our Elite Glass Wall Solutions and support next-generation office design built around openness, flexibility, and focus. Both inline and barn profiles deliver architectural elegance, space optimization, and acoustic harmony.

Designed with workplace flow in mind, our doors enhance productivity, light transmission, and collaboration zones without interruption.

PC350 Inline Sliding Doors

MINIMALIST DESIGN. MAXIMUM IMPACT.

KEY APPLICATIONS AND BENEFITS

- Sleek, self-supporting design preserves unobstructed sightlines
- Mounted to the ceiling or to the underside of 3-3/4" (95mm) or 4-7/8" (124mm) thick drywall
- Perfect solution for single-glazed sidelites in glass wall systems
- Available in full-height or transom configuration

Inline Sliding Doors are perfect for environments that demand clean lines and elevate spatial experience while also providing privacy when required.

PC350 Barn Sliding Doors

COMBINED FLEXIBILITY AND
STYLE IN TIGHT SPACES

KEY APPLICATIONS AND BENEFITS

- Surface-mounted directly onto the external surface of drywall
- Ideal for double glazed sidelites when more acoustic performance is required
- Perfect for compact, creative, or retrofitted environments
- Preserves square footage while enabling privacy and flow

Ideal for areas where traditional glass partitions aren't feasible, Barn Sliding Doors bring a unique blend of space-saving design and modern aesthetics.

Performance in

Motion

SLIDING DOORS WITH
UNIVERSAL FUNCTIONALITY

We've reimagined every mechanical detail to ensure that beauty doesn't come at the cost of function. Inline and Sliding Barn Doors are engineered for seamless, silent performance — essential for today's agile work environments.

Enhanced Operation and Accessibility

- New soft-close system for fluid, controlled movement
- Upgraded roller mechanism supports up to 120 kg with ADA-compliant pull forces
- Up to 36" (914mm) clear openings on single leaf to meet current and future accessibility codes

Modular Door Leaf Construction

- Available in standard aluminum framed glass or a custom commercial grade wood slab
- Framed aluminum door supports $\frac{3}{8}$ " (10mm) and $\frac{1}{2}$ " (12mm) glass
- Choose from a full range of glazing styles to match design and acoustic needs
- Multiple locking and pull style options

Beyond the

Frame

FUTURE-FORWARD DESIGN.
BUILT-IN FLEXIBILITY.

PC350 Sliding Door Solutions are built to evolve, offering future-ready solutions for dynamic spaces. Thoughtful details empower reconfiguration, minimize waste, and keep projects adaptable to change.

Built-In Flexibility

- Post-installation drop or brush seal upgrades
- Convertible locking system to adapt to on-site room reconfigurations, without the removal of the door frame
- Door leaf can be easily reversed from left-hand to right-hand (or vice versa) during or after installation if needed.
- Lock hardware comes pre-installed from the factory to simplify on-site installation.
- Adjustable door glass thickness after initial installation, without the removal of the aluminum door leaf
- New sidelite wall framing with glass levelling capabilities for easier site accommodation and installation

Modern Aesthetics

A UNIFIED LOOK ACROSS SPACES

Achieve harmony across your interiors with coordinated finishes and streamlined profiles.

Our system is designed for architects and designers who value seamless transitions and spatial clarity.

- Consistent material and finish palette for doors, walls and pull hardware
- Sliding Inline Valance Cover aligns with ceiling channel for a clean visual line
- New seamless door leaf profiles with integrated glass stop trims

Advanced Sound Attenuation

SILENCE THAT PERFORMS

Create focus zones and quiet environments with door solutions that protect acoustic privacy, which is essential in today's collaborative and hybrid offices.

- Drop and brush seal configurations enhance acoustic efficiency
- Soft-close mechanism paired with magnetic closure ensures complete perimeter sound containment
- Enhanced front jamb and astragal seals ensure minimal noise leakage in single and double leaf door applications
- Ideal for private offices, therapy rooms, and open-plan areas needing breakout zones

Bringing Design to Life

WE CREATE INSPIRED WORKSPACES

Great spaces are born from intention. Sliding Door Solutions from PC350, help shape how people work, connect, and create. Designed to support openness and adaptability, our solutions reflect a new era of workspace thinking which is dynamic, collaborative, and human centered. Let's build spaces that move with the future.

Let's build together.
