Senior NetSuite Consultant

Job Category: Information Technology (IT) / Consulting

Industry: Architectural Products & Construction Services

Work Location: 130 Nolan Ct, Markham, ON L3R 2V7

Job Duration Type: 12-Month Contract with Full-time, Permanent Extension

Work Model: Greater Toronto Area, (Hybrid Preferred) / In-Person or Remote Considered

Number of Positions Open: 1

Posting Period: July 2026 – August 2026

About Us:

We are a leading architectural partitions and interior solutions company serving commercial, institutional, and public sector clients across Canada and the United States.

As part of our continued growth and digital transformation initiatives, we are seeking an experienced Senior NetSuite Consultant to support the enhancement, optimization, customization, and integration of our NetSuite environment.

This role is ideal for a highly experienced practitioner with strong functional and technical expertise in project-based businesses.

What We Bring to the Table:

- A values-driven environment built on integrity, respect, honesty, and fairness, with a strong focus on professionalism and collaboration.
- Inclusive culture with equal opportunity, accessibility, and workplace accommodation to support employees of all backgrounds and abilities.
- Generous time off and work life balance, with three weeks' vacation for full-time employees, five personal days, paid holidays, a paid birthday day, and flexible options including limited remote work for eligible roles.
- Opportunities for learning and development, including discretionary tuition and training support, plus clear expectations, regular reviews, and ongoing feedback to help you grow in your role.

Position Summary:

The Senior NetSuite Consultant will serve as the primary in-house NetSuite expert, responsible for:

- Designing custom reports, dashboards, and KPI frameworks
- Implementing on-demand system enhancements and backend customizations
- Enabling robust two-way integration between NetSuite and Opera Job Management Software
- Supporting operational scalability across finance, sales, estimating, production, and project management functions

The consultant will work closely with executive leadership and functional teams to ensure NetSuite continues to support evolving business requirements and growth objectives.

Contract Structure:

- 12-month contract engagement
- Flexible working arrangements
- Hybrid GTA presence preferred
- Competitive market-based compensation
- Potential extension based on business requirements

Your Responsibilities:

Custom Reporting & Business Intelligence

- Design and maintain customized reports, dashboards, saved searches, and KPI frameworks
- Develop executive, operational, financial, sales, and project reporting solutions
- Improve visibility into project profitability, margins, backlog, pipeline, working capital, and operational performance
- Automate reporting processes and reduce spreadsheet dependencies

NetSuite Customization & Development

- Design and implement custom workflows, forms, fields, scripts, and process improvements
- Develop and deploy backend system modifications as business needs evolve
- Optimize system architecture, business processes, and data structures
- Troubleshoot functional and technical issues and support continuous improvement initiatives

Systems Integration (Critical Requirement)

- Design, implement, and maintain two-way integration between NetSuite and Opera Job Management Software
- Ensure accurate synchronization of:
 - Customers
 - Projects and job information
 - Financial transactions
 - Change orders
 - Project status data
 - Operational reporting information
- Develop API-based or middleware solutions as required
- Establish data governance, reconciliation, validation, and error-handling processes
- Maintain integration documentation and support long-term scalability

Stakeholder Collaboration

- Work closely with:
 - Executive Leadership
 - Finance
 - Estimating
 - Project Management
 - Production
 - Sales

The successful candidate will gather business requirements and translate them into practical, scalable technical solutions.

Qualifications:

Required Experience

- Minimum 7–10 years of NetSuite consulting, implementation, or development experience
- Extensive experience building custom reports, dashboards, and saved searches
- Strong experience implementing workflows, scripts, and backend customizations
- Demonstrated experience integrating NetSuite with third-party applications
- Experience supporting project-based, construction, manufacturing, or architectural products businesses
- Strong understanding of financial, operational, and project management processes

Mandatory Technical Skills

- Advanced Suite Analytics reporting
- Suite Script customization and development
- Suite Talk API development
- REST and SOAP integration experience
- Experience integrating ERP systems with project and job management platforms

Strongly Preferred

- Direct experience integrating NetSuite with Opera Job Management Software
- Experience with Celigo or other middleware platforms
- Construction, specialty contracting, or architectural products industry experience
- Strong knowledge of job costing, project accounting, and operational reporting requirements

Personal Attributes

- The successful candidate will be:
 - Highly analytical and solutions-oriented
 - Comfortable working directly with senior executives and operational leaders
 - Self-directed and capable of operating independently
 - Responsive to evolving business priorities
 - Focused on delivering scalable, long-term solutions rather than temporary fixes

How to Apply:

Interested candidates are invited to email their resume to careers@pc350.com

Please include the following in your email:

- A summary of your relevant NetSuite implementation experience
- Examples of custom reporting and integration projects you've completed
- A description of your experience integrating NetSuite with third-party project or job management systems (including technologies, APIs, middleware platforms, and business processes involved)
- Details of any specific Opera Job Management experience (if applicable)
- Your availability and salary expectations
